PROFESSIONAL HISTORY

Globe Telecom, Philippines
Solutions Designer, Contract (04.2020 - 12.2020)

Participated in platform technology development projects, including technical requirements gathering, resource allocation, design and documentation, scheduling, development, implementation, task tracking, and status reporting.

Created and updated technical documentation for projects including: functional specifications, process design and decomposition, data and schema models, and data flow, entity relationship, network, object, sequence and flowchart diagrams.

Analysed platform design and promote standards that are aligned to a balanced, elegant, and integrated solution that is consistent and fits the servicing requirements of the stakeholders.

Collaborated closely and regularly with other Technology Teams, Quality Engineering, Product Development, Project Management and Customer Service.

Helped develop, maintain and enforce the company's software development standards, and conducts design and code reviews on a regular basis to ensure compliance; oversaw the development of platforms used.
